

We would like to introduce our fire rated range of glass – “**Keralite**” which is tested with steel doors up to 240 minutes and timber doors up to 120 minutes.

It has been tested in accordance with all standards like BS EN 1634-1: 2000, UL 9, UL10B, UL10C, NFPA 252, NFPA 257.

These glasses are made in France by Saint Gobain and stocked exclusively in UAE by us. The Keralite glass is cut to your required size and delivered based on your requirement.

Keralite® is a glass-ceramic suitable for integration with fire-rated steel doors and timber doors and fire walls, providing highly effective fire protection from both sides while allowing clear vision.

Advantages:

- Clear vision (No Wires)
- UL listed upto 180 Mins
- BS EN fire rated upto 240 mins
- Covered under Certifire upto 240 minutes
- Tested for 240 minutes in steel doors and 120 minutes in wooden doors
- No thermal expansion and will not crack even after cooling, so no dangerous shards
- Cut locally, allowing for quick lead times. – Next day pickup and deliveries for urgent requirements.
- Saint Gobain Vetrotech has presence of a local technical team who can assist you on the best solution for your testing needs.
